

## Summative Score Labels

ACT® Aspire® provides adhesive labels (when ordered by customers) for all students who complete one or more of the ACT Aspire assessments (math, science, reading, English, and writing) during the current test window. All scoring information for each student will be provided on a single label. Labels will be provided by school and sorted by grade and alpha ordered by students' last names.

Report labels are ordered in PearsonAccess<sup>next</sup>, at the end of the testing window. Find instructions for ordering in the [Arizona ACT Aspire Support Page](#).

As shown in the sample label on the next page, student demographic information is printed on the top half of the label, including:

- First and Last Name
- Current grade in school
- Date of Birth
- Student ID
- School Attended
- School District
- Test Window during which the student was assessed

### Scale Scores

Scale scores for one or more of the ACT Aspire tests are included on the label. The following data can be found in the "Scale Score" column:

- A three-digit ACT Aspire scale score, or
- "N/A" indicating that test was not taken, or
- "Scoreable" or "NS" (non-scorable) for writing tests

### ELA Score (English/Language Arts)

Students taking the ACT Aspire English, reading, and writing assessments will receive an ELA score (calculated by taking the average of the English, reading, and writing scales scores). If one or more of the English, reading, or writing scale scores are "N/A," or if one or more of the scale scores are "NS," the ELA Score will appear as "N/A." See the *ACT Aspire Interpretive Guide for Summative Reports* for more information about the ACT Aspire ELA score. Below the ELA scale score, an indication of "Ready" or "Below Readiness" appears.

### STEM Score (Science, Technology, Engineering, and Math)

Students taking both the ACT Aspire math and science assessments will receive a STEM score (calculated by taking the average of the math and science scale scores). If either the math or science scale score is "N/A," the STEM Score will appear as "N/A." See the *ACT Aspire Interpretive Guide for Summative Reports* for more information about the ACT Aspire STEM score. Below the STEM scale score, an indication of "Ready" or "Below Readiness" appears.

### Composite Score and Career Readiness Indicator (Grades 8 and Early High School Only)

Students who receive scale scores on the ACT Aspire English, reading, math, and science tests will receive a three-digit composite score (calculated by taking the average of the four tests). Below this score, "Bronze," "Silver," "Gold," or "Platinum" will appear, linking the student's ACT Aspire Composite score with predicted performance toward an ACT National Career Readiness Certificate® (NCRC®). If one or more of the English, math, reading, or science scale scores are "N/A," the Composite Score will be "N/A" and no Career Readiness Indicator will appear. More information on the Composite score, progress toward career readiness indicator and the NCRC can be found in the *ACT Aspire Interpretive Guide for Summative Reports*.

### Predicted Composite Score (Grades 7-10) for the ACT® Test

For students taking the ACT Aspire Early High School English, math, reading, and science assessments, a Predicted ACT Composite Score is provided (1-36). If fewer than four scales scores are present, or if one or more of the scale scores are "N/A," the Predicted ACT Composite Score will be "N/A."

Predicted Composite Score (Grades 6-9) for the PreACT®

For students taking the ACT Aspire English, math, reading, and science assessments (grades 6-9), a Predicted PreACT Composite Score (1-35) is provided. If fewer than four scales scores are present, or if one or more of the scale scores are "N/A," the Predicted PreACT Composite Score will be "N/A."
